

**Appl. No. 09/787,632**  
**Amdt. dated Aug. 6, 2003**  
**Reply to Office Action of April 28, 2003**

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1 - 6 (Canceled)

7. (Previously Amended) The fungicidal composition of claim 22 further comprising another fungicidal active material.

11. (Previously Amended) The fungicidal composition of claim 22 further comprising an agriculturally suitable inert support and optionally an agriculturally suitable surfactant.

12. (Previously Amended) The fungicidal composition of claim 22 comprising from 0.5 to 99% of the combination of compound (I) and compound (II).

13. (Previously Amended) A process for controlling the phytopathogenic fungi of crops in an area, which consists in applying a compound (I) and a compound (II) as defined in claim 22 to said area.

**Appl. No. 09/787,632**  
**Amdt. dated Aug. 6, 2003**  
**Reply to Office Action of April 28, 2003**

14. (Previously Amended) A process for controlling the phytopathogenic fungi of crops of the *phytophthora* and *plasmopara* genera comprising applying an effective and non-phytotoxic amount of the fungicidal composition of claim 22 onto the crops to be treated.

  
15. (Original) A process as claimed in claim 14, characterized in that the fungicidal composition is applied by spraying a liquid onto the aerial parts of the crops to be treated.

16. (Previously Amended) The process as claimed in claim 14, characterized in that the amount of fungicidal composition corresponds to a dose of compound (I) of between 10 and 500 g/ha.

17. (Previously Amended) The process as claimed in claim 14, characterized in that the amount of fungicidal composition corresponds to a dose of compound (II) of between 10 and 500 g/ha.

18. (Canceled)

19. (Original) The fungicidal composition as claimed in claim 7, wherein said another fungicidal active material is iprodione.

**Appl. No. 09/787,632**  
**Amdt. dated Aug. 6, 2003**  
**Reply to Office Action of April 28, 2003**

20. (Original) The process as claimed in claim 16, wherein the amount of the fungicidal composition corresponds to a dose of compound (I) of between 20 and 300 g/ha.

21. (Original) The process as claimed in claim 17, wherein the amount of the fungicidal composition corresponds to a dose of compound (II) of between 20 and 300 g/ha.

*D/X*  
22. (Previously Added) A fungicidal composition comprising a synergistic fungicidally effective amount of:

- A) compound (I), (4-S)-4-methyl-2-methylthio-4-phenyl-1-phenylamino-2-imidazolin-5-one, and
- B) compound (II), N<sup>1</sup>-[(R)-1-(6-fluoro-2-benzothiazolyl)ethyl]-N<sup>2</sup>-isopropoxycarbonyl-L-valinamide,

wherein the ratio of the weight of compound (I) to the weight of compound (II) is in the range of from 5 to 0.5.

23. (New) A process for controlling the phytopathogenic fungi of crops of the *Phytophthora infestans* and *Plasmopara viticola* species comprising applying to said species an effective and non-phytotoxic amount of the fungicidal composition comprising:

- A) compound (I), (4-S)-4-methyl-2-methylthio-4-phenyl-1-phenylamino-2-imidazolin-5-one, and

**Appl. No. 09/787,632**  
**Amdt. dated Aug. 6, 2003**  
**Reply to Office Action of April 28, 2003**

**B) compound (II), N<sup>1</sup>-[(*R*)-1-(6-fluoro-2-benzothiazolyl)ethyl]-N<sup>2</sup>-isopropoxycarbonyl-L-valinamide,**

wherein the ratio of the weight of compound (I) to the weight of compound (II) is in the range of from 2 to 4 onto the crops to be treated.
